ARTISANAL COMPANY

FEEL
THE FEELINGS
OF ARTS

Sassi Pottery
ARTISANAL COMPANY

Established in Moknine in 1990, our company has specialized in the manufacture and sale of hand-made terracotta products.

By combining artisanal and industrial aspects, we produce more than 1000 articles per month, including hand-painted pots, outdoor pots, indoor pots jars, urns, and various decorative objects. The 'handmade' and 'respect for the environment' principles we stand for

The notion of "handmade" is omnipresent in our company to keep a touch of authenticity in our production.

Open for export for a few years, we are pervasive in fairs and foreign markets: in the Maghreb, Europe, Australia, Asia, and the United States.

THE FAMILY STORY

It was in 1960 that the founder Mohamed Sassi embarked on the production of artisanal pottery, then his son, Sami Sassi, developed this familiar heritage by creating a bigger pottery factory in 1995. Aware of the great potential of our fathers' creations, the current four brothers have developed this familiar heritage by creating in 2010 The Sassi Pottery Company.

Our company is a family company resulting from the effect of the experience led by professionals in the field, we were born and raised in a family that works in the pottery crafts with more than 150 years of experience, therefore, the partners are the members of the family now (who are the father and the 4 brothers)

We see big for the future of our business and currently exhibits in international markets.

OUTDOOR GARDEN POTS

These pots are renowned for their delicate hand carvings and sculpturing. Each pot is truly unique. Since each piece is crafted by artisans the sizes vary slightly from piece to piece. They are high fired, so they are stonger and more durable than other Terracotta.

These pots are an incredible value when compared to their Italian counterparts. Known for their white Terracotta color, we carry many different styles, from classical to modern. They can withstand many seasons outdoors.

These Terracotta planters appropriate to most traditional or modern gardens. As with all of our tunisian terracotta planters, these are made from frost-proof clay guaranteed to minus 15 degrees.
